SUMMARY

Computer Science student at Damietta University (expected graduation 2028) with hands-on experience building responsive web applications using HTML, CSS, JavaScript, and Bootstrap. Completed a 120-hour Web Designer training program at NTI with a 92.5% score and built projects published on GitHub. Interested in Front-End Development and eager to apply my skills in a real team environment. Available full-time for the 6-month internship, based in Egypt.

EDUCATION

Bachelor of Science in Computer Science 10/2024 – 06/2028
Damietta University — Damietta, Egypt
Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Databases, Web Development

EXPERIENCE

Web Designer Trainee 08/2026 – 09/2026
National Telecommunication Institute (NTI) Remote

- Completed a 120-hour Web Designer training program covering HTML, CSS, JavaScript, Bootstrap, and freelancing fundamentals, with a final score of 92.5%.
- Built Cutscene, a large Netflix-inspired movie and series streaming website, applying responsive design principles (see Projects).
- Debugged and resolved technical issues during development, strengthening problem-solving skills.
- Gained practical knowledge of the freelancing industry and professional web development practices.

PROJECTS

Cutscene 08/2026 – 09/2026
Netflix-Inspired Movie & TV Series Discovery Website
Tech Stack: HTML, CSS, JavaScript, Bootstrap

- Built a responsive, Netflix-inspired web platform that lets users discover and browse movies and TV series in a modern, user-friendly interface.
- Designed the layout and UI with HTML, CSS, and Bootstrap to work smoothly across desktop, tablet, and mobile screens.
- Implemented dynamic content browsing with JavaScript, organizing titles into clear categories for easy discovery.

GitHub | **Live Demo**

Personal Portfolio Website 06/2026 – 07/2026
Responsive Front-End Developer Portfolio

- Designed and developed a responsive single-page portfolio showcasing my skills, projects, education, and contact details, deployed on GitHub Pages.
- Built a mobile-first layout with Bootstrap and custom CSS, with a sticky navigation bar linking to all sections.
- Implemented a filterable projects gallery (Websites / Web Apps / Landing Pages) and an interactive contact form using JavaScript.
- **GitHub** | **Live Demo**
